NOTICE OF VIOLATION AND ORDER

NOTICE IS HEREBY GIVEN THAT:

- 1. Mullinax Concrete Service Company (Mullinax) is authorized to discharge produced sediment laden wash water, under WYPDES permit WY0094366, into settling ponds, then treat the water and release the water into Goose Creek, a 2AB water of the state.
- 2. The Wyoming Department of Environmental Quality, Water Quality Division (WQD) conducted an inspection of the facility on September 16, 2014. During the inspection a pipe that carries the produced wash water to the settling ponds was found to be damaged and the processed wash water was discharging into Goose Creek prior to any treatment. This discharge was not authorized and therefore is a violation of the permit conditions.
- 3. Mullinax was advised to cease operations until the pipe could be repaired. According to information submitted by Mullinax the operations were shut down and the repairs were completed the next day. Mullinax also completed a spill report.

This Notice is being sent to you pursuant to W.S. 35-11-701(c)(i), which requires that in any case of the failure to correct or remedy an alleged violation, the Director of the Department of Environmental Quality shall cause a written notice to be issued and served upon the person alleged to be responsible;

ORDER

BEFORE THE ENVIRONMENTAL QUALITY COUNCIL - STATE OF WYOMING

WHEREFORE IT IS HEREBY ORDERED THAT:

 To minimize the potential for this type of discharge to occur again DEQ requires Mullinax to implement an inspection process of the discharge pipe across Goose Creek to verify the pipeline is operating correctly with no discharge occurring out of the pipe except into the settling ponds. The pipeline should be inspected every day the plant intends to send processed water to the settling ponds. This inspection shall be documented and kept on file for review during future WYPDES compliance inspections.

2. If the pipeline is found to be damaged the transport of produced wash water to the settling ponds shall cease until the proper repairs have been made. Any repairs to the pipeline shall be documented and include the date and what repairs were completed.

This ORDER is final unless, no later than ten (10) days after the date this notice is received; it is appealed by filing a written request for a hearing before the Environmental Quality Council. If a hearing is requested, the hearing petition shall be mailed to the Chairman, Wyoming Environmental Quality Council, Room 1714 Herschler Building, 1st Floor West, 122 West 25th St., Cheyenne, Wyoming 82002. The second petition shall be mailed to the Director, Wyoming Department of the Environmental Quality, Herschler Building, 4th Floor West, 122 West 25th St., Cheyenne, Wyoming 82002. Both petitions must be sent by certified mail, return receipt requested.

NOTHING IN THIS NOTICE OF VIOLATION (NOV) AND ORDER shall be interpreted to in any way limit or contravene any other remedy available under the Environmental Quality Act, nor shall this NOV AND ORDER be interpreted as being a condition precedent to any other enforcement action.

Signed this_ day of Director 6 Administrator **Department of Environmental Quality**

PLEASE DIRECT ALL INQUIRIES TO: Kevin M. Wells, WYPDES Natural Resource Program Supervisor, Wyoming Department of Environmental Quality, Water Quality Division, Herschler Building, 4th Floor West, 122 West 25th Street, Cheyenne, Wyoming 82002. Telephone 307-777-8669.
