Mark,

WWC is preparing bond calculations pursuant to W.S. § 35-11-416 for the Brook Mine. We anticipate submitting this bond package sometime in July or August for WDEQ/LQD review. WWC has already submitted a reclamation performance bond, using guideline 12, for the Brook Mine and all deficiencies have been resolved. WDEQ/LQD has no guidance on the preparation of this type of bond therefore WWC is preparing the bond to its best understanding of the act utilizing geographically appropriate statistical information compiled by the USDA.
