

WYOMING DEPARTMENT OF ENVIRONMENTAL QUALITY
AIR QUALITY DIVISION
MEMORANDUM

TO: Lars Lone, Compliance Program Manager

THROUGH: Greg Meeker, District 4 Engineer
Charles Plymale, Solid and Hazardous Waste Inspector (Electronic)

FROM: Jon Walker, Air Quality Engineer 

SUBJECT: Hopper Metals/Mike Dimick Burn Observation
IMPACT Correspondence ID COR059970

DATE: December 22, 2016

At approximately 9:00 on December 22, Solid and Hazardous Waste Inspector Charlie Plymale and I arrived at 483 Bonneville Road in Shoshoni to conduct a site observation related to previous burn activities noted at this location. Mr. Michael Dimick operates Hopper Metals at this location for the purpose of metal recycling. When Charlie and I arrived there were no signs of burning occurring at this time. Charlie noted that the large burn containers that he had observed previously had been relocated. Since Charlie had previously obtained permission to inspect this facility we went to the area where the two burn containers were now located. One container had a small amount of ash inside. The other container had a much larger volume of ash inside. This container was photographed. Charlie had documented previous burn activity at this location in a Solid and Hazardous Waste inspection report. Charlie and I left the area at about 9:15. Photographs of the large burn container noted previously are attached.
