483 Bonneville Rd.

Shoshoni, WY 82649

July 6, 2016

To whom it may concern:

This letter has been drafted as a response to a notice received from the Fremont County Solid Waste Disposal District December 7, 2015. Issues will be addressed in the following section.

Issue #1: we have taken measure to better educate our customers of what waste streams are acceptable for the Shoshoni Landfill to avoid MSW being mixed in the loads.

Issue #2: while the reasons for lack of payment were not stated in the notice received, our drivers have been issued credit cards and checks put in trucks to avoid lack of payment at time of disposal.

Issue #3: while the accusations are not accurately stated, clarification has been received regarding the secure load policy and no infractions have been noted since. Change in my position as a board member have also changed which will further avoid allegations.

After conversation with the superintendent, board chairman, and board attorney, it is requested that site revocation be lifted for hoppermetals at the Shoshoni Landfill. As a company, we have chosen to use only the Riverton landfill/ transfer station the past several months rather than request privilege sooner.

Thank you for your consideration on the matter,

A handwritten signature in black ink, appearing to read "Mike Dimick". The signature is written in a cursive, somewhat stylized font.
