patrick,
it has been a very busy summer and fall. it seems more ducks are in a row and we are ready to start the permit process. our main focus is the ability to process c&d waste. we aim to recycle and divert what materials we can from the landfill and create value in the material for consumers. it is not my intent to build a fancy facility at this point, but do what it takes to be able to process waste as soon as possible. are you available in the near future that you can direct me in the right direction so i can avoid pitfalls and unnecessary paperwork? i want to be sure that i apply for the right permit, the most simple permit possible.
thanks,
mike

Mike,

Here is a link to our web page. I have attached copies of the permit application form and guideline and the pertinent rules we discussed earlier today. I also included a copy of Chapter 7 regarding financial assurance which we did not discuss.

If you have any questions regarding this information, please feel free to contact me.
