**RE: Notice of Intent to Locate Placer Mining Claims
TTT Ranch Company**

Dear Don:

I am taking this opportunity to provide you with some information concerning the Notice of Intent to Locate (NOITL) which I submitted to the TTT Ranch Company (TTT).

I have enclosed for your information a complete copy of the NOITL, including a map illustrating the lands included under the NOITL, which I sent to TTT on April 7, 2008. Additionally, I have enclosed information from the Wyoming Bureau of Land Management website which explains the requirements and purpose of the NOITL. The NOITL is simply a notification process required by the BLM prior to locating mining claims on split estate lands.

My plans to locate these placer mining claims is strictly personal on my part. These claims are very speculative and long term in nature. I am locating these claims as "association claims", consisting of eight (8) claimants, which include my immediate family members - my father and mother, my sister Leslie, my brother, my children, etc.

Proposed activities as listed on the NOITL form will consist of locating and staking the eight (8) claim corners with steel fence posts. I will not be conducting any exploration activities on these lands nor do I have any plans to develop any minerals on these claims should they exist. My intent is to someday possibly lease these claims to a mining company should the claims prove to contain any bentonite deposits.

Additionally, I was in error when I suggested that I could include Jim Crossingham as a claimant. I am limited to eight (8) claimants on each of these one hundred sixty acre claims

(20 acres per claimant) and I have reached the limit of eight claimants with the inclusion of my immediate family members.

If you should have any questions concerning this information, please do not hesitate to contact me at 265-0373.

Sincerely,

Bruce A. Lawson
