Rc: Appeal of the Copperleaf Subdivision Water Supply, et al.
 Docket No. 06-3814

Dear Counsel:

During our meeting to discuss exhibits, we considered using the Intervenor's Exhibit A as the main subdivision application, along with corresponding supplements and supporting documents, because that document was already Bates numbered and would allow us not to introduce multiple exhibits of the same documents. Exhibit A is the Intervenor's Application to the DEQ which ultimately led to the permit to construct at issue in this case. There may be other information in the DEQ file to which I did not have access. Intervenor's Exhibit A is comprised of the following:

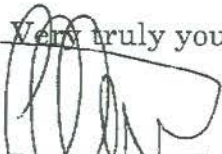

#	Document	Bates Number
1	Subdivision Application submitted to the Wyoming Department of Environmental Quality, dated August 31, 2005	107-154
2	DEQ letter to Bucky Hall showing no adverse recommendation	285-286
3	DEQ letter to Jeremy Easum, dated September 27, 2005	287-289
4	Sage Engineering letter to Jeff Hermansky, dated October 6, 2005	290-301
5	E-mail from John Barnes to Hermansky and Ebsen	302-303
6	Letter from Sage Civil Engineering, dated May 31, 2006, enclosing and encompassing the water supply and treatment design report submitted to the Wyoming DEQ	155-284

John Burbridge and Tony Wendtland
July 2, 2007
Page 2

#	Document	Bates Number
7	Pilch Engineering letter to DEQ, Purcell and Herman-sky, dated June 26, 2006 (Bates numbering includes other letters submitted by Mr. Pilch to the Wyoming DEQ and generally contains the entire Pilch package and schematics)	304-393

Mr. Wendtland has already generally reviewed these documents, and he has asked me not to make a copy for him because we anticipate the DEQ's file contains the same documents. Many of the documents contained in Intervenor's Exhibit A are maps or other schematics that are not easily reproducible by the copying machine we have in our office. I will bring this exhibit with me to our Sunday, July 8, 2007 meeting in my office. Thank you.

~~Very~~ truly yours,

LAURENCE W. STINSON
