

## Kevin Mahaffey

My name is Kevin Mahaffey. I have lived in Wyoming all my life and have seen what the oil and gas industry has done to our beautiful state. Fossil fuel has our government in there hip pocket. The fines given to companies who violate rules are treated as a bonus financially for the state. There are many more abandoned and uncapped wells than the number the state says there are. There definition of these wells being abandoned is not accurate . Please do more to combat this problem. Thank you for giving me the opportunity to voice my opinion.
