

Chapter 3

Radiation Protection Standards

Section 1. Purpose.

(a) This Chapter establishes standards for protection against ionizing radiation resulting from activities conducted pursuant to licenses issued by the Department.

(b) This Chapter is designed to control the receipt, possession, use, transfer, or disposal of licensed material such that the total dose to an individual, excluding radiation dose from background sources, does not exceed the standards for protection against radiation as outlined in this Chapter.

(c) The limits provided for in this Chapter do not apply to doses due to background, from medical diagnosis or therapy, from individuals administered radioactive material and released, or from voluntary participation in medical research.

Section 2. Scope.

This Chapter applies to persons licensed by the Department to acquire, own, possess, use, transfer, offer or receive for transport, or dispose of source material recovered from any mineral resources processed primarily for purposes other than obtaining the source material content.

Section 3. Implementation.

Any existing license condition imposed by the Department that is more restrictive than this Chapter remains in force until there is an amendment or renewal of the license.
