

Department of Environmental Quality

To protect, conserve and enhance the quality of Wyoming's environment for the benefit of current and future generations.

John Corra, Director

December 11, 2007

Mr. Robbie E. Roberts, Regional Administrator US Environmental Protection Agency, Region 8 1595 Wynkoop Street Denver, CO 80202 - 1129

Dear Mr. Roberts.

In response to 107(d)(1) of the Clean Air Act, the State of Wyoming is making recommendations on attainment or nonattainment classifications for the State of Wyoming for the 24-hour PM_{2.5} National Ambient Air Quality Standard that became effective on December 18, 2006.

The State has used the most recent three years of PM_{2.5} monitoring data available to make attainment recommendations. The results and supporting data are found in Attachments 1 and 2 to this letter. The State used guidance issued by EPA on June 8, 2007 in a memorandum from Robert J. Meyers entitled "Area Designations for the Revised 24-Hour Fine Particulate National Ambient Air Quality Standard" to determine appropriate boundaries for state designations. The guidance suggests not only using PM_{2.5} monitored data, but also using nine factors to appropriately create non-attainment boundaries. Additionally, EPA gave the option of flagging PM_{2.5} data affected by natural events during the most recent three years of data collection. The State of Wyoming did not flag any data used in this designation. Based on this guidance, the State would like to designate the regions listed below as attainment/unclassifiable for the Revised 24-Hour PM_{2.5} Standard.

24-hour PM_{2.5} NAAQS Designation

Albany County Attainment/Unclassifiable

Big Horn County Attainment/Unclassifiable

ATTACHMENT 1: PM_{2.5} Monitored Data in Wyoming 2004-2006

The primary and secondary 24-hour $PM_{2.5}$ standards are met when the three year average of the 98th percentile 24 hour concentrations, as determined in accordance with the 40 CFR 50, Appendix N, is less than or equal to 35 μ g/m³. The following table presents data collected from 2004-2006 that have met the data collection requirements presented in Appendix N. Data from other $PM_{2.5}$ monitoring sites have not collected 3 full years of data can be found in Attachment 2.
