RE: Solid Waste Chapter 6 Operating Permit
Anchor Environmental
SHWD File # 50.022

Dear Mr. Skovgard:

This letter constitutes a Wyoming Department of Environmental Quality, Solid Waste Chapter 6 operating permit for the Anchor Environmental Facility (SHWD File # 50.022).

On October 21, 2013, the Wyoming Department of Environmental Quality, Solid and Hazardous Waste Division (Department) completed its final review of the most recent permit application for the facility identified above, signed October 10, 2013. The Department determined this application is generally complete and technically adequate.

The Department has also received the necessary information to document that the public notice requirements of Chapter 1, Section 2(b)(i and/or ii) of the Solid Waste Rules and Regulations were properly completed. No comments were received by the Department during the designated public comment period. (If comments received, note how resolved.)

This facility is subject to the financial assurance requirements of Chapter 7 of the Solid Waste Rules and Regulations. The financial assurance mechanism for this facility, in the amount of \$252,987.81, must be provided in accordance with permit condition #1 below.

DEQ Exhibit 24

EQC No. 13-5802

The operator of the facility authorized by this permit shall be responsible for complying with the terms of the permit application specified above and this permit. Based on the Department's permit application review and/or the Department's inspection of this facility, the Department has concluded that this permit shall be issued under the following conditions:

Permit Condition #1

The operator of this facility shall submit a financial assurance mechanism, in the amount of \$252,987.81, to the Department for review and approval. Written approval by the Department is required prior to beginning any operational activities at the facility.

Permit Condition #2

The operator of this facility shall upon completion of construction activities, contact Patrick Troxel of the Department to schedule a final site inspection. The final construction inspection must be completed and approved in writing prior to beginning any operational activities at the facility.

The operator of the facility authorized by this permit shall allow the administrator or an authorized representative, upon the presentation of credentials and other documents as may be required by law to enter upon the operator's premises where a regulated facility or activity is located or conducted, or where records must be kept under the conditions of this permit; have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit; inspect at reasonable times any facilities, equipment (including monitoring and control equipment), practices, or operations regulated or required under this permit; and sample or monitor at reasonable times, for the purposes of assuring permit compliance or as otherwise authorized by the appropriate rules and regulations of the Department, any substances or parameters at any location.

This permit is valid for eight (8) years from the date of this letter. In order to renew this permit, a renewal permit application shall be submitted between nine (9) and six (6) months prior to the expiration of this permit. Prior to the preparation of a renewal permit application, the Department strongly recommends a face-to-face pre-application meeting with the operator, manager, consultant and the Department.

The conditions imposed by this permit shall take precedence over conflicting designs, specifications or procedures contained in the referenced permit application document. Failure to comply with this permit or the condition(s) which have been imposed may be grounds for permit revocation under the provisions of Chapter 1, Section 4(b) of the Wyoming Solid Waste Rules and Regulations.

If you are unable to accept any of the conditions in this permit, you must appeal this permit by sending a letter stating your objections to the Environmental Quality Council, Herschler Building, 122 West 25th Street, Cheyenne, Wyoming 82002, within sixty (60) days of your receipt of this permit.

If you have any questions regarding the Department's review, inspection or this permit, please feel free to contact Patrick Troxel at 307.335.6950.

Sincerely,

Alan Edwards
Administrator
Solid and Hazardous Waste Division

Todd Parfitt
Director
Department of Environmental Quality
