

Terri Lorenzon
Director of Environmental Quality
Council

This is to notify you that we are withdrawing our objection and will not be attending the hearing.

We do have concerns that we would like to have addressed.

One of our number one concerns is the safety on Whalen Canyon Rd. Access from private properties onto the Road and safety for our school buses.

This road divides our ranch property so we are concerned about our livestock passing back & forth. An underpass would probably be needed and a fence along the road to keep the livestock off the road.

We would definitely need dust control. This is going to interfere with our time and the way we make our living.
