RE: Air Pollution Controls for the Upper Green River Basin

I write in support of the LDAR rules that you are proposing. The relationship between natural resource states and consuming states needs to be fair and equitable; it should not leave the natural resource states and communities with health and pollution problems. It is gratifying that your department has developed rules that will help keep further harm from being done.

The rules will help address the ground-level ozone and the greenhouse gases. Finally it also simply conserves resources, which ought to be on everyone's priority list.

Many thanks for your consideration.

Sincerely,

A handwritten signature in black ink, appearing to read "Richard Ridgway".
