

March 30, 2015

Attn: Steve Dietrich
Administrator of the Wyoming Department of Environmental Quality, Air Quality Division

Dear Mr. Dietrich

Upon review of the proposed Nonattainment Area Regulations, specifically Chapter 8, - Section 6, Flogistix, L.P. would like to offer our formal approval and support of the draft rule.

Flogistix specializes in emissions reduction projects in the oil and gas industry, and engages in projects throughout the state of Wyoming. Our goal is to assist area production companies in the monitoring and capture of potential emission sources on oil and gas production facilities. We feel that the rules put forth initiate an essential catalyst in reducing harmful emissions, and create an economically viable opportunity for production companies.

In other states, production companies have faced a series of challenges in meeting strict environmental regulatory requirements. This demand has led to the development of considerable technological advances in eliminating volatile organic compound atmospheric emissions. Vapor recovery systems must respond to rapidly changing operating conditions and advanced programming and data point monitoring has become an integral component in production facility design.

Vapor recovery, utilizing vapor capture vessels and compression systems, enable production companies to eliminate greenhouse gas emissions, as opposed to direct atmospheric injection or uncontrolled combustion devices (which merely reduce the severity of noxious gases being emitted to the atmosphere). In order to achieve complete emissions control; extensive planning, process research, and implementation are critical.

In addition to the environmental and health benefits to the citizens of the state of Wyoming, properly executed vapor recovery projects are economically viable, creating a new revenue stream for production companies.

The proposed draft rule for the Upper Green River Basin could serve as a successful template for similar regulations in other regions of Wyoming.

Sincerely,

Jason Fortner
Director of Sales and Marketing
