Mark,

Well it's pretty evident that reading a calendar is not my strong suit. I think I had about 8 different projects going on yesterday so you're likely not the only confused person out there. My apologies for the mix-up, however, if tomorrow morning is still available (exclusive of 8-8:45am), we could come up at 9 or 9:30 if that works and review the information with you.

Thanks for your time.

Ron

Mark,

Per our initial meeting regarding the proposed RAMACO coal mine located north of Sheridan, we have completed general arrangement drawings of the coal handling facilities and the associated spur track for review by WYDOT. We would like to schedule a meeting with you to discuss the drawings in preparation for review by WYDOT engineering and ROW personnel. The meeting would be used to determine if the information is in sufficient detail for WYDOT's review, particularly with respect to facility construction beneath the I-90 bridge structure that provides access to Taylor Quarry and encroachment of the spur track within the WYDOT right-of-way for State Highway WY 345.

I am available the remainder of this week, but out of town 7/7 thru 7/9. I will be back in the office 7/10 and beyond if any of the previous dates do not work for you.

Thanks

Ron
