Re: Class B Operator Training

Dear Mr. Luchts,

As a operator of six facilities here in Fremont county and a Board of Trustee member of the Wyoming Petroleum Marketers Association (WPMA), I respectfully request your adoption of WPMA's requested amendments to the proposed rule revisions to Chapter 17, Storage Tanks, as presented by Executive Director Mark Larson. In particular, I would like to assure that the Class B Operator be allowed to provide Class C Operator training and skills demonstration for no less than six or more facilities.

As Mr. Larson stated in his letter to you dated March 27, 2008, the EPA specifically allows for more than one facility to have oversight by a Class B Operator. I am aware that several states, including Colorado, are allowing Class B Operators to provide the training and have oversight over almost unlimited facilities. While I understand your desire to assure adequate knowledge of underground storage tank systems, let me assure you that I take this responsibility very seriously as well and will more than exceed the minimums of Class C Operator Training...not only to assure the safety of our employees and clientele but because I understand the seriousness of product releases and the intrinsic dangers they represent.

I know you are aware of the significant issues Wyoming is facing regarding finding, hiring and retaining adequate employees. As you are aware Wyoming's unemployment rate is the lowest since 1976. Accordingly, finding manager's sufficient to meet the very tight proposed requirement of only 2-3 facilities allowed for Class B Operator oversight may mean that companies frequently violate the regulations. I do not believe it was the intent of the EPA to enact such tight requirements. It is my belief that Wyoming needs to look for workable solutions that get to the intent of the regulations, not promulgate overly stringent and burdensome requirements focused solely on departmental enforcement.

I am requesting that DEQ **NOT** limit Class B Operator training and oversight to any less than six facilities and that the Class B Operator be allowed to provide Class C Operator training and skills demonstration The intent of the EPA regulations can be met without placing such a significant burden on the small business petroleum marketers of Wyoming.

Sincerely,

Michael V. Bailey
