

Department of Environmental Quality

To protect, conserve and enhance the quality of Wyoming's environment for the benefit of current and future generations.

Mark Gordon, Governor

Todd Parfitt, Director

MEMORANDUM

TO: Honorable Mark Gordon, Governor

FROM: Todd Parfitt, Director, Wyoming Department of Environmental Quality
[Agency Contact: Craig Hults, phone 777-7066, email craig.hults@wyo.gov]

SUBJECT: Proposed Revisions to Uranium Recover Program (URP) Rules – Land Quality Division, Department of Environmental Quality

DATE: April 15, 2022

PRIORITY: HIGH – April 29, 2022

SUMMARY: Notice of Agency Rulemaking

RECEIVED
APR 15 2022
GOVERNMENT SERVICES

The Department of Environmental Quality, Land Quality Division (LQD) is proposing to amend URP Chapter 3 – Radiation Protection Standards, Chapter 4 – Licensing Requirements for Source and Byproduct Material, Chapter 5 – Notices, Instructions, and Reports to Workers, and Chapter 9 – Transportation of Radioactive Material. The proposed revisions are intended to update incorporation by reference dates to January 1, 2022, correct several citations to the Federal regulations, make grammatical corrections, and address WY Attorney General's statutory review comments. Specific information on the proposed revisions can be found in the Statement of Reasons for UPR Chapters 3, 4, 5, and 9.

The LQD Advisory Board reviewed the rules during meetings held on March 22, 2022. The Advisory Board recommended the rules proceed to the Environmental Quality Council for formal rulemaking. The proposed rules are not expected to be controversial. The Attorney General's Office has reviewed the rules for statutory authority and agreed they could proceed. The LQD is requesting to proceed with formal rulemaking with this rule package.

GOVERNORS RESPONSE OPTIONS:

- Agency may proceed.
- Delay Public Comment and Set Up Meeting w/ _____

Signature: Governor's Counsel
