The proposed rulemaking Docket #24-4101 revises LQD Coal Chapter 14 – Exploration for Coal by Drilling. The proposed revisions to Chapter 14 were drafted in response to an Office of Surface Mining Reclamation and Enforcement (OSMRE) concern letter regarding a previously submitted coal program formal amendment. Additional revisions were made as suggested in a July 2021 email from OSMRE. The revisions correct several typographical and punctuation errors and clarifies references to the LQD within the rules.

The proposed revision was drafted in response to a request from the Wyoming Mining Association to increase the term length from a maximum of ten years to a maximum of twenty years. The revision is consistent with the Nuclear Regulatory Commission (NRC) rules and regulations. No other changes to Chapter 4 are proposed.

The proposed rulemaking Docket #24-4103 contains nine chapters of rules for the new LQD Source Material Program. The nine new chapters include: 1 – General Provisions; 2 – Inspections, Enforcement, and Penalties; 3 – Radiation Protection Standards; 4 – Licensing Requirements for Source Material; 5 – Notices, Instructions, and Reports to Workers; 6 – Financial Assurance Requirements; 7 – Fees; 8 – Risk Informed, Performance Based Licensing and Inspection; and 9 – Transportation of Radioactive Material. The new rules were drafted in response to 2023 Wyoming House Bill 0061 which granted WDEQ authority to promulgate regulations to become and agreement state with the NRC for the regulation of source material.

All proposed rules in Docket #s 24-4101, 24-4102, and 24-4103 meet minimum substantive state statutory requirements per Wyoming Statute (W.S.) § 16-3-103(a)(i)(G). The agency has complied with the requirements of W.S. § 9-5-304 and completed a taking checklist for each docket.
