**Subject: Medicine Bow Fuel & Power LLC
 Proposed Integrated Gasification and Liquefaction Plant
 (PSD Air Quality Permit Application AP-5873)
 Updated Page to Air Quality Permit Application (AP-5873)**

Dear Mr. Schlichtemeier:

Please find enclosed eight (8) copies of three revision pages for the Medicine Bow Fuel & Power PSD Air Quality Permit Application. These revision pages reflect updates to the total number of work hours per year for each black start generator from 250 to 360 hours, on pages 4-3, 4-30 and 5-8 that were inadvertently omitted in previous revisions. This change was made in January 2008, and emission calculations and air dispersion modeling submitted since January have reflected the revised operating hours. Please replace the pages included in your copies of the December 31, 2007 revised permit application with these pages.

The summary sheet detailing all the changes on a page-by-page basis has been updated to reflect these revised pages and a copy is attached to each set of revision pages. Also included in this package is one (1) CD-ROM containing an electronic version of the complete, revised permit application. If you need more copies, please let me know.

Please contact me via phone at (303) 740-2684 or email to Katrina_Winborn@URSCorp.com if you need additional information or copies of the revised application.

Sincerely,

Katrina A. Winborn
